EDUCATION

University of Georgia **Athens, GA**
B.S. in Computer Science, GPA: 3.86 **Expected May 2027**

- **Minors**: Fintech, Informatics
- **Honors: P**hi Beta Kappa, Omicron Delta Kappa, CURO Research Award
- **Certificates:** CompTIA Security+, Google Cybersecurity, MIT Cybersecurity for Critical Urban Infrastructure, Community Cyber Security Maturity Model (CCSMM), DEC x UGA AI Literacy

WORK EXPERIENCE

Cybersecurity Risk Analyst Intern – *UGA Carl Vinson Institute of Government (CyberArch),* GA Jan 2026 to Current

- Guided Georgia local governments, schools, and businesses through cybersecurity risk reviews against the CIS Critical Security Controls and NIST Cybersecurity Framework (CSF), drafting final reports in Microsoft Word so non-technical leaders knew which security gaps to fix first.
- Interviewed city managers, IT staff, and executives during client walkthroughs to test 100+ Implementation Group 1 (IG1) safeguards, tracking evidence and findings in Microsoft Excel that became each client's remediation plan.
- Delivered prioritized remediation recommendations that helped clients justify security budgets, prepare for cyber insurance requirements, and reduce their exposure to ransomware.
- Served as PO Team Leader, coordinating kickoff meetings, travel, and status reports for client engagements, reviewing intern findings and revising reports with supervisor feedback before they reached clients.
- Redesigned the pre-assessment questionnaire and document request process so clients answered control questions faster and analysts started each engagement with complete evidence.
- Automated Cybersecurity Maturity Model Certification (CMMC) audit data classification with Python and SQL, reducing manual control mapping during compliance reviews.

Security Operations Center Analyst Intern – *UGA Enterprise Information Technology Services*, GA Jun 2026 to Current

- Investigated reported phishing emails for UGA's Microsoft 365 tenant of 1,000,000+ daily emails, managing the ticket queue and documenting each verdict so malicious messages were removed before students and staff acted on them.
- Escalated confirmed threats to senior analysts with written evidence, rotating through their specialties under their direction to secure affected accounts in Microsoft Entra ID and Microsoft Defender.

Software Engineering Intern – *Voya Financial*, GA Jun 2025 to Aug 2025

- Built an internal web application on Microsoft Azure Functions and SQL Server that automatically tracked email campaign responses, so the team no longer monitored them by hand before hard deadlines.
- Authored technical documentation and presented the application's design, testing results, and error analysis to senior leadership and cross-functional teams.
- Worked in Agile sprints with a development team in Azure DevOps, incorporating code-review feedback before each release.

PROJECTS

AI in Business Operations Capstone – *Mastercard* (FinTech Certificate Program) Aug 2026 to Current

- Researched where AI can safely reduce risk and manual approvals in Mastercard's technology operations, working with a 5-person cross-functional team of computer science, finance, and MIS students and reporting to Mastercard business operations vice.
- Evaluated AI use cases in monitoring, observability, and change management against governance criteria such as human-in-the-loop review, validation data, and token costs, interviewing practitioners about real implementation failures.
- Built a demo AI agent that scores the risk of IT change requests using synthetic data, helping leaders decide which changes can skip manual approval as standard changes.

TECHNICAL SKILLS

- **Frameworks & Compliance:** *NIST Cybersecurity Framework (CSF), CIS Critical Security Controls, Cybersecurity Maturity Model Certification (CMMC), Community Cyber Security Maturity Model (CCSMM)*
- **Audit & Risk:** *Risk Assessments, Control Testing, Client Walkthroughs, Remediation Planning, Security Awareness Training*
- **Tools:** *Microsoft Excel, Microsoft Word, Microsoft PowerPoint, SharePoint, Microsoft 365, Microsoft Entra ID, Microsoft Defender, Microsoft Azure, Python, SQL*

COMMUNITY INVOLVEMENT AND LEADERSHIP

President – *Society for Cybersecurity* Apr 2025 to Current

- Led a 200+ member cybersecurity student organization, managing an executive board and partnering with firms including Aprio to host recruiting events and technical workshops.
- Secured the organization's email, LinkedIn, and cloud storage accounts to comply with UGA information security standards, and wrote onboarding documentation that brought new officers up to speed faster.
